

"Complete Embedded Computing offerings are a key expertise within Alcom's portfolio. Our in-depth collaboration with our customers results often in a highly integrated and cost-optimized customer specific system solution. The product range includes Flat Panel Solutions from 1.5" to 65" integrating the latest Touch Panel technologies if required, industrial monitors and terminals. Industrial Computing products include SBCs, Systems on Module concepts, Storage Memory, PanelPCs, Test & Measurement and Automation Solutions. We select carefully the right building blocks for the newest applications with the aim of guaranteeing longest possible service life! We encourage our customers to learn more about Alcom's products and capabilities on TFT & Embedded Systems."
